1 [Introducing client/server technologies in information systems curricula](#)

Abhijit Chaudhury, H. Raghav Rao  
September 1997 **ACM SIGMIS Database**, Volume 28 Issue 4

**Publisher:** ACM Press

Full text available: [pdf\(1.02 MB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

One goal of information systems (IS) departments in business schools is to train IS professionals with the necessary technical skills to support the IS function in companies. This paper suggests that changes are needed for most current IS curricula to meet the technical requirements of the client/server (C/S) world of technologies. It is hoped that the ideas presented here will stimulate debate and discussions as to how this transition can be accomplished.

### 1 Supply/demand of IS doctorates in the 1990s

Sirkka L. Jarvenpaa, B. Ives, Gordon B. Davis

January 1991 **Communications of the ACM**, Volume 34 Issue 1**Publisher:** ACM PressFull text available: [pdf\(2.71 MB\)](#)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

The field of information systems (IS) has experienced a severe shortage of faculty throughout its 20-year history. This shortage now appears to be lessening. A survey of the supply of IS doctorates finds a steady stream of graduates from IS doctoral programs. In 1989, 61 universities in the U.S. offered Ph.D. or Doctor of Business Administration (D.B.A.) concentrations in information systems. A survey of these programs resulted in 51 responses, including all the programs producing significa ...

### 2 The 1985-1986 Taulbee survey

David Gries

August 1987 **Communications of the ACM**, Volume 30 Issue 8**Publisher:** ACM PressFull text available: [pdf\(618.83 KB\)](#)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Computing Research Board's latest survey on the production and employment of Ph.D.'s and faculty in computer science and engineering depicts a young, optimistic discipline where supply may not always meet demand.

### 3 The 1988-89 Taulbee survey report

David Gries, Dorothy Marsh

September 1990 **Communications of the ACM**, Volume 33 Issue 9**Publisher:** ACM PressFull text available: [pdf\(1.65 MB\)](#)
 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This report describes the results of a survey of the Forsythe list of computing Departments1, completed in December, 1989. The survey concerns the production and employment of Ph.D.s that graduated in 1988-892 and the faculty of Ph.D.-granting computing departments during the academic year 1989-90. All 129 Computer Science (CS) departments (117 U.S. and 12 Canadian) participated. In addition, 29 of 32 departments offering the Ph.D. in Computer Engin ...

**4 The 1986-1987 Taulbee survey** D. Gries, D. MarshAugust 1988 **Communications of the ACM**, Volume 31 Issue 8**Publisher:** ACM PressFull text available:  [pdf\(878.39 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Computing Research Board's 1986-87 Taulbee Survey includes the latest statistics on production and employment of Ph.D.'s and faculty in computer science and engineering. For the first time, departments offering Ph.D.'s in computer engineering are also included.

**5 Imbalance between growth and funding in academic computing science: two trends c** D Gries, R Miller, R Ritchie, P YoungSeptember 1986 **Communications of the ACM**, Volume 29 Issue 9**Publisher:** ACM PressFull text available:  [pdf\(1.11 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This report is endorsed by the Computer Science Board and prepared by the board's Committee on Research Funding in Computer Science.

**6 The 1987—1988 Taulbee survey** David Gries, Dorothy MarshOctober 1989 **Communications of the ACM**, Volume 32 Issue 10**Publisher:** ACM PressFull text available:  [pdf\(768.07 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The Computing Research Board's 1987-1988 Taulbee Survey includes the latest statistics on production and employment of Ph.D.'s and faculty in computer science and engineering. Included also are departments offering Ph.D.'s in computer engineering.

**7 Software engineering...an economic perspective**

J. H. Morrissey, L. S.-Y. Wu

September 1979 **Proceedings of the 4th international conference on Software engineering ICSE '79****Publisher:** IEEE PressFull text available:  [pdf\(925.58 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The production of software can be viewed as an economic, as well as an engineering, process. Since the prime factor of production is the labor inputs of programmers and systems analysts, the personnel characteristics and employment trends of these occupations in the United States are reviewed. These labor factors are then related to prior and expected trends in the installation and utilization of computer equipment. A discussion of programming labor productivity is followed by a digression ...

**8 Staffing the MIS Function** Theodore C. WilloughbyDecember 1972 **ACM Computing Surveys (CSUR)**, Volume 4 Issue 4**Publisher:** ACM PressFull text available:  [pdf\(1.36 MB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**9 Determinants of MIS employees' turnover intentions: a structural equation model** Magid Igbaria, Jeffrey H. GreenhausFebruary 1992 **Communications of the ACM**, Volume 35 Issue 2**Publisher:** ACM PressFull text available:  [pdf\(11.09 MB\)](#)Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#), [review](#)

**Keywords:** IS personnel, job satisfaction, multivariate analysis, organizational commitment, personnel management, turnover intentions

**10 Walter Carlson interview: November 26-27, 2005; Los Gatos, California** Thomas HaighJanuary 2006 **ACM Oral History interviews****Publisher:** ACM PressFull text available:  [pdf\(292.16 KB\)](#)Additional Information: [full citation](#), [abstract](#), [index terms](#)

Walter Carlson discusses his entire career in the computing field. Born in Denver in 1916, Carlson studied Chemical Engineering at the University of Colorado, gaining both bachelors and masters degrees in Chemical Engineering. On graduation Carlson went to work for DuPont, where he worked as part of the corporate Engineering Department to improve industrial processes in different plants. In 1954 his involvement in a feasibility study to investigate computer procurement won Carlson a j ...

**11 Level II technical support in a distributed computing environment** Tim LeehaneSeptember 1996 **Proceedings of the 24th annual ACM SIGUCCS conference on User services SIGUCCS '96****Publisher:** ACM PressFull text available:  [pdf\(5.73 MB\)](#)Additional Information: [full citation](#), [references](#), [index terms](#)**12 Essays in computing science**

C. A. R. Hoare

January 1989 Book

**Publisher:** Prentice-Hall, Inc.Full text available:  [pdf\(20.91 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [cited by](#), [review](#)

Charles Antony Richard Hoare is one of the most productive and prolific computer scientists. This volume contains a selection of his published papers. There is a need, as in a Shakespearian Chorus, to offer some apology for what the book manifestly fails to achieve. It is not a complete 'collected works'. Selection between papers of this quality is not easy and, given the book's already considerable size, some difficult decisions as to what to omit have had to be made. Pity the editor weighin ...

**13 Personal computing: personal computers and the world software market** Larry PressFebruary 1991 **Communications of the ACM**, Volume 34 Issue 2**Publisher:** ACM PressFull text available:  [pdf\(1.20 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

It may be trite to say that "the world is shrinking," but it is true nonetheless. Political and technological changes are edging us in the direction of the global village. We have the

economic unification of Western Europe, the transition of Eastern Europe to market economies, and free trade agreements and negotiations in the Western hemisphere. Blue jeans and rock and roll music are found throughout the world, we can direct dial to Iceland, and your grandmother may have a FAX m ...

**15 The Japanese approach: a better way to manage programmers?**

Paul S. Licker

September 1983 **Communications of the ACM**, Volume 26 Issue 9

**Publisher:** ACM Press

Full text available:  [pdf\(671.83 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

With a turnover rate among computer programmers of 25%-50% per year, it's time somebody came up with a better way to manage computer professionals. One approach that holds promise is to create a Japanese-style Theory Z atmosphere in the firm, stressing lifetime employment, non-specialized career paths, collective decision-making, and other holistic matters.

Women, as well as African Americans, Hispanic Americans and Native Americans are

represented in the information technology (IT) workforce in percentages that are far lower than their percentages in the population as a whole. While recruiting efforts are crucial for increasing the participation of women and minorities, it is equally important that we retain those already in the IT workforce. Here we present an assessment of the relevant literature addressing retention issues for women and minorit ...
